Hello FCC Representatives,

As a Cox Communication customer, and heavy internet user i'm asking you to keep Net Neutrality and to drop the internet freedom proposal if not already. I understand that many members of the state, and national legislative branch have pushed against Net Neutrality, or the free use of an uncensored, and uncontrolled internet.

I urge that you respect the wishes of your constituents when bills come across, or actions are made against Net Neutrality.

Please do the right thing for the people, and not for the corporations.

Thank You,

Savannah Melher
